

How to Free Storage Space on Android Smartphone

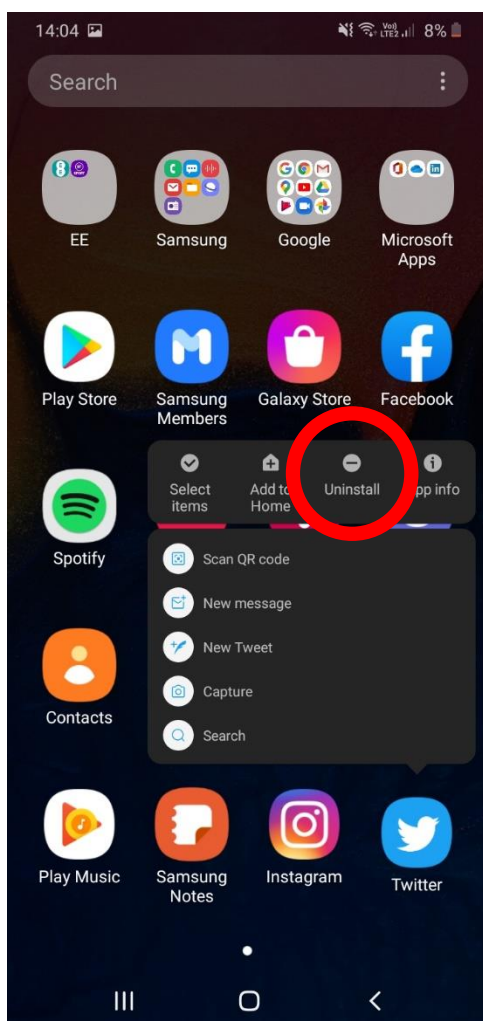

Some messaging and video-calling apps can take up a lot of storage on your mobile phone, which may lead to the phone running slower than normal or the battery life not lasting very long. To minimise the risk of this happening, it's important to delete any apps or documents from your phone that you no longer use. Here, you will find a step-by-step guide on how to do this if you own an Android smartphone, e.g. Samsung, Huawei, etc.

How to Uninstall Apps

Method 1

Step 1. Hold your finger down on the app you wish to uninstall. A series of options should appear above the app icon.

Step 2. Click "Uninstall" to remove the app

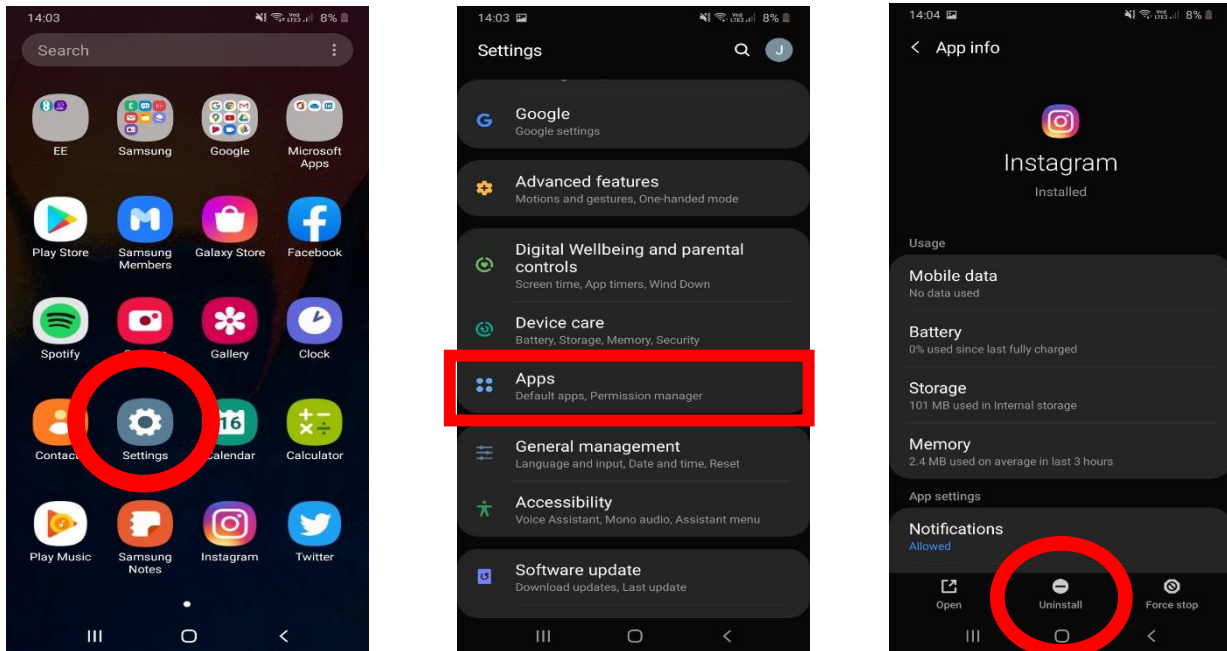

Method 2

Step 1. Go to "Settings"

Step 2. Scroll down until you come to "Apps". When in apps, find the app that you want to uninstall. They will be listed in alphabetical order.

Step 3. Select the app you wish to uninstall and choose the "Uninstall" option.

How to Delete Pictures and Videos

Step 1. Open the photo gallery on your phone

Step 2. Hold down on the photo/video you wish to delete until a circle appears in the top left-hand corner of each photo/video in your gallery

Step 3. If you wish to delete more than one item, click the circle on each photo/video you wish to delete until a tick appears. This means that this item has been selected to be deleted.

Step 4. Press "Delete". If you have selected more than one item, the number of items being deleted should appear next to the "Delete" symbol.
